

Composite Material

FIXTURES

Composite Material

"We have re-formulated our time tested standard ECP Plus composite material to handle no-lead heat and applications, that our newer ECP Pro has been able to handle."

If you require material for in-house machining, EMC can supply it to you.

EMC manufactures and distributes Composite Materials in a wide variety of sizes and specifications, depending on your needs:

- Sheet or cut-to-size
- Thickness from 3mm to 12mm stock, any thickness custom quoted.
- Static Dissipative, Optically Sensitive
- All brands and types available (CDM, ECP-Plus, ECP-PRO, Durostone, Durapol and others)
- Most available for immediate delivery

ECP Plus:

- Great for all applications with leaded and no-lead
- Very good for tens of thousands of cycles
- 25-30% less expensive than our major competitors
- Stock sheet size is 19" x 46.5"
- Surface Resistivity is $10^5/10^9$
- Short term temperature capacity is 335° degrees C
- Available in 5, 6, 8, 10 and 12 mm thicknesses
- Custom thickness and sizes available on request

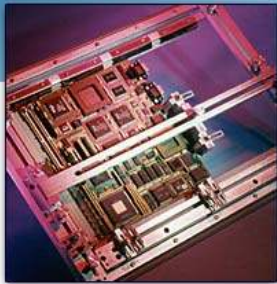

ECP Pro:

- Great for all applications with leaded and no-lead
- Very good for thousands of cycles
- 40-45% less expensive than our major competitors
- Stock sheet size is 36" x 72"
- Surface Resistivity is $10^5/10^9$
- Short term temperature capacity is 325° C
- Available in 3, 5, 6 and 8 MM thicknesses.

As always, our nominal cutting charge really offsets the up charge for shipping stock sheets. It's what ever you require and we'll be happy to accommodate. As always, EMC's cutting tolerance is $+.125"/-0"$, so you always have a little material to square up on during milling.
